PROFESSIONAL SUMMARY

Results-driven Senior Full-Stack Engineer and AI Solutions Architect with 9 years of experience building scalable web platforms, cloud-native infrastructure, and LLM-powered applications. Proven track record delivering end-to-end solutions across real estate, logistics, government, and media sectors — from architecting AWS microservices to deploying production RAG pipelines trained on millions of internal records. Skilled in bridging product vision with technical execution across distributed, cross-cultural teams.

RELEVANT EXPERIENCE

LGUSuite | Senior Software & Cloud Infrastructure Engineer

Cainta, Rizal Philippines (Remote, Full-Time) • January 2025 - July 2026

- Re-architected a legacy monolithic government system onto AWS (EC2, RDS, S3, Lambda), cutting deployment time by ~60% and achieving 99.9% uptime SLA.
- Designed and shipped an in-house AI chat application (RAG + LLM pipeline using OpenAI/Claude APIs) trained on millions of internal government records — enabling staff to query institutional data in natural language.
- Implemented CI/CD pipelines via GitHub Actions and Docker, reducing manual deployment errors and enabling zero-downtime releases.
- Hardened cloud security posture through IAM role restructuring, VPC isolation, and automated vulnerability scanning.

Freelance — Full Stack Developer | Independent Contractor

Remote (AU/SE) • May 2023 -December 2024

@Realty — Queensland, Australia

- Scaled a high-traffic real estate platform to handle millions of property data transactions with optimized PostgreSQL queries and Redis caching layers.
- Built an automated error-tracking and ticket-generation system, reducing mean time to resolution (MTTR) for production incidents by approximately 40%.

Webicient — Stockholm, Sweden

- Architected and delivered 10+ WordPress web applications and led full migrations to headless CMS (Contentful) architecture, enabling animated, performance-optimized front-ends with React.

Experience Digital | Mid-Level Software Engineer

Sydney Australia (Remote, Full-Time) • February 2022 - May 2023

- Modernized a legacy estate-planning application into a modular, AWS-hosted codebase — improving maintainability and enabling feature velocity for a 5-person engineering team.
- Built and maintained a custom CMS pipeline serving dynamic TV advertising content to broadcast clients across multiple regions.

Sparkle Star International | **Senior Software Engineer**

Manila Philippines (Remote, Full-Time) • September 2020 - February 2022

- Led full-cycle development of 5+ B2B SaaS products including a job portal, Upwork-style marketplace, food delivery app, logistics tracker, and time-tracking platform.
- Tech stack: MERN (MongoDB, Express, React, Node.js), CodeIgniter, PostgreSQL — all deployed to production with active user bases.

Unosoft Labs | **Senior Software Engineer**

Manila, Philippines (Remote, Full-Time) • August 2019 - September 2020

- Modernized a UK client's legacy web platform, delivering new features including 3DS secure payment integrations (Stripe / custom gateway) and Kentico CMS content blocks.

Innov8tive Design & Development | **Web Developer & Designer**

Makati, Philippines (On-site, Full-Time) • September 2017 - December 2018

- Designed and built 5+ WordPress sites and extended a proprietary Agoda-style hotel booking web app with new search filters, booking flows, and admin dashboards.
